direct light

indirect light

Direct and indirect light, thanks to the LED light sources hold inside two colored aluminium cylindrical supports which are at the endpoint of the twice power cables. One is for the ceiling connection, the other one is used as a counter-weight. The light is reflected on a swivel disk in a white opal methacrylate material which spaces and slides along two cables, to create different light effects. Interior cylindrical support with a cable and an electronic driver on the plug.
