

Light Module Fra Tac

Gianfranco Rollo

colors

Typology Pendant Wall

Utilisation Indoor

3.5 W 500 lm

diffuse light

indirect light

The individual module has two circular magnets located at the inner apex. The modules produce light when the two magnets "engage," and they are simple to detach and rotate to modify the light's orientation. Composed of recyclable aluminum, each module has a weight of only 150g. The 'C'-shaped cut is created using a laser and calendaring process, which eliminates the need for extra machine steps and lowers production costs while increasing overall sustainability. Next to the magnet is the LED strip.
